## PREFACE

The current publication on Medical Certification of Causes of Death (MCCD) for the year 2021 in respect of Mizoram State is the seventeenth in the series. This is the first time data are presented district wise medically certified deaths by leading causes as per international classification of disease. The Report in its present form is the output of data processed in the software designed and supplied by the Office of the Registrar General of India, Ministry of Home Affairs, Government of India, New Delhi.

Data in the present report of MCCD are coded in accordance with the 10th Revision of International Classification of Diseases.

The Report has been prepared on the basis of data on institutional deaths and some domiciliary cases, the readers of this Report may bear in mind that this study is mostly confined to 112 Hospitals / Institutions which submitted Monthly Returns on MCCD as MCCD Report of non institutional death received by Directorate of Economics & Statistics is very less.

I would like to express my appreciation to Officers and Staff of the Civil Registration System (CRS) Branch of this Directorate for their untiring efforts in coding and processing of the data, Mission Director, National Health Mission, H&FW Department for financial and technical support and my gratitude to all the Medical Officers and Staff of Health & Family Welfare Department, Govt. of Mizoram, Private Institutions/Hospitals and local RBDs for their contribution of monthly MCCD reports.

It is hoped that this Report will serve as useful tool for policy makers relating to health sectors, socio-economic planners, health planners, researchers, scholars, etc. Suggestions for further improvement of the Report are welcomed.

Dated : Aizawl,  
The 20<sup>th</sup> June, 2022.

(B. LALRINHLUA)

Addl. Chief Registrar of Births & Deaths  
&

Director  
Economics & Statistics  
Mizoram : Aizawl

(ii)

## MCCD AT A GLANCE

Medical Certification of Cause of Death (MCCD) scheme was proposed by WHO as an imperative tool to obtain scientific and reliable information in terms of causes of mortality. The scheme formulated by office of the Registrar General, India is a big step towards establishment of a system in the country for obtaining data on cause of death. Reliable cause specific mortality statistics is required on a regular basis by Administrators, Policy Planners, Researchers and other Professionals for evidence based decision making with regard to resource allocation, monitoring of indicators, identifying the priorities for Programmed and other related activities in the area of Public Health. Keeping this in view, the Scheme of *Medical Certification of Cause of Death* was introduced in the Country under the provisions of Registration of Births and Deaths Act, 1969. Section 10 (2) of the Act empowers the State Government to enforce the provision relating to MCCD in specified areas taking into consideration the availability of medical facilities. Section 10 (3) of the Act provides for issuing a certificate of the cause of death by the medical practitioner who has attended on the deceased at the time of terminal illness.

The necessary data is collected in the prescribed form designed by World Health Organization (WHO) and are supposed to be filled-up by the medical professionals attending to the deceased at the time of terminal illness. Thereafter, these forms are to be sent to the Office of the Addl. Chief Registrar for tabulation as per National List based on International Classification of Death (ICD 10). The State subsequently send it to the Office of the Registrar General, India, Ministry of Home affairs, Govt. of India.

The report on Medical Certification of Cause of Death 2021 is based upon 3,736 (2,415 Males and 1,321 Females) medically certified deaths supplied by 112 Government and Private Hospitals, UPHC, CHC, PHC and some local RBDs who submitted Monthly Returns on MCCD.

(iii)

During 2021, 2415 Males and 1321 Females deaths were recorded in the MCCD in Mizoram. The classification of medically certified deaths by leading causes as per International Classification of Disease 11<sup>th</sup> revision in district wise is presented as under.

(v)

The following are five leading cause constituting around 60.8% of total medically certified deaths:

- I. Diseases of the Digestive system (15.5%).
- II. Diseases of the Circulatory System (15.1%).
- III. Covid-19 (10.4%).
- IV. Neoplasms (10%).
- V. Disease of the Respiratory System (9.8%).

- Top leading cause group during 2021 are Diseases *of the Digestive system* contributing 15.5% of the total death. Diseases of the Liver contributing (*Alcoholic, Toxic, Hepatitis, Cirrhosis & other diseases of liver*) 10.7 % of the total death.
- The Second leading cause group during 2021 are Diseases *of the Circulatory system* contributing 15.1% of the total death. *Hypertensive diseases* account for 4.7%.
- The third leading cause group *Covid-19* contributing 10.4% of total medically certified deaths.
- The Fourth leading cause group *Neoplasms (cancer)* 10% of the total medically certified deaths, of which *Malignant Neoplasm of digestive organs (oesophagus, stomach, colon, rectum, anal, liver & bile, pancreas)* accounts for 3.8%.
- Under the fifth leading group *Diseases of the Respiratory system* accounting for 9.8% of the total medically certified deaths and *Pneumonia* account for 3%.
