## PREFACE

The current publication on Medical Certification of Causes of Death (MCCD) for the year 2022 in respect of Mizoram State is the eighteenth in the series. The Report in its present form is the output of data processed in the software designed and supplied by the Office of the Registrar General of India, Ministry of Home Affairs, Government of India, New Delhi. Leading causes of death as per ICD-10 are presented in district wise.

Data in the present report of MCCD are coded in accordance with the 10th Revision of International Classification of Diseases (ICD-10).

This Report has been prepared on the basis of data on institutional deaths and some domiciliary cases, this report is mostly confined to 112 Hospitals / Institutions which submitted Monthly Returns on MCCD and some local RBD units.

I would like to express my appreciation to Officers and Staff of the Civil Registration System (CRS) Branch of this Directorate for their untiring efforts in coding and processing of the data. I thanked the Mission Director, National Health Mission, H&FW Department, Mizoram for financial and technical support. I also extend my deepest gratitude to all the Medical Officers of Hospitals / Medical Institutions

It may be worth mentioning that the percentage of MCCD data achieved so far out of the total registered death in Mizoram, presented in this report is not yet perfection, but is much higher than the percentage of National level. So, it is hoped that this report, will serve as useful tool for policy makers relating to health sectors, socio-economic planners, health planners, researchers, scholars, etc. Suggestions for further improvement of the Report are welcomed.

Dated : Aizawl,  
The 18<sup>th</sup> April, 2023.

(B. LALRINHLUA)

Addl. Chief Registrar of Births & Deaths

&

Director

Economics & Statistics

Mizoram : Aizawl

## MCCD AT A GLANCE

Medical Certification of Cause of Death (MCCD) scheme was proposed by WHO as an imperative tool to obtain scientific and reliable information in terms of causes of mortality. The scheme formulated by office of the Registrar General, India is a big step towards establishment of a system in the country for obtaining data on cause of death. Reliable cause specific mortality statistics is required on a regular basis by Administrators, Policy Planners, Researchers and other Professionals for evidence based decision making with regard to resource allocation, monitoring of indicators, identifying the priorities for Programmed and other related activities in the area of Public Health. Keeping this in view, the Scheme of *Medical Certification of Cause of Death* was introduced in the Country under the provisions of Registration of Births and Deaths Act, 1969. Section 10 (2) of the Act empowers the State Government to enforce the provision relating to MCCD in specified areas taking into consideration the availability of medical facilities. Section 10 (3) of the Act provides for issuing a certificate of the cause of death by the medical practitioner who has attended on the deceased at the time of terminal illness.

The necessary data is collected in the prescribed form designed by World Health Organization (WHO) and are supposed to be filled-up by the medical professionals attending to the deceased at the time of terminal illness. Thereafter, these forms are to be sent to the Office of the Addl. Chief Registrar for tabulation as per National List based on International Classification of cause of Death (ICD 10). The State subsequently send it to the Office of the Registrar General, India, Ministry of Home affairs, Govt. of India.

The report on Medical Certification of Cause of Death 2022 is based upon 4,064 (2,656 Males and 1,408 Females) medically certified deaths reported by 112 Government and Private Hospitals, UPHC, CHC, PHC and some local RBDs who submitted Monthly Returns on MCCD.

(iii)

During 2022, 2657 Males and 1407 Females deaths were recorded in the MCCD in Mizoram. The classification of medically certified deaths by leading causes as per International Classification of Disease 10<sup>th</sup> revision in district wise is presented as under.

(v)

The following are five leading cause constituting around 68% of total medically certified deaths:

- I. Diseases of the Digestive system (18%).
- II. Diseases of the Circulatory System (16%).
- III. Disease of the Respiratory System (15%).
- IV. Certain Infectious and Parasitic Diseases (10%).
- V. Neoplasms (9%).

- Top leading cause group during 2022 are Diseases *of the Digestive system* contributing 18% of the total death. . Diseases of the Liver (*Alcoholic, Toxic, Hepatitis, Cirrhosis & other diseases of liver*) 14 % of the total death.
- The Second leading cause group during 2022 are Diseases *of the Circulatory system* contributing 16% of the total death. *Cerebrovascular diseases* account for 4% .
- The third leading cause group *Diseases of the Respiratory system* accounting for 15.% of the total medically certified deaths and *Pneumonia* account for 4%.
- The Fourth leading cause group Certain Infectious and Parasitic Diseases accounting 10% of the total medically certified deaths.
- Under the fifth leading group *Neoplasms (cancer)* 9% of the total medically certified deaths, of which *Malignant Neoplasm of digestive organs (oesophagus, stomach, colon, rectum, anal, liver & bile, pancreas)* accounts for 3%.
